DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-5, drawn to a method of detecting infection by amplification with a primer mixture and detecting the amplified products with a probe.

If applicant elects group I, applicant must also select one primer from Tables 2 and 4 for each of the required regions in claim 1 and select one probe from Tables 3, 4, or 5.

Group II, claim(s) 6-12, drawn to primers, probes, and kits.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the special technical feature of group I is a method with steps to amplify with a primer mixture and detecting the amplified product with a probe. Group II does not share the special technical feature of group I because the single primers and probes are not required for use in any specific method and the kits do not require method steps, and alternatively, a probe, or a set of primers. Therefore, since the special technical feature of group I is not shared by group II, the claims lack unity of invention.

As discussed above, applicant must select one primer for each of the required regions in claim 1 and one probe. This is necessary because the primers and probes are structurally unique and are used for functionally different purposes of amplifying and/or detecting structurally and functionally unrelated products.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1648

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shanon A. Foley whose telephone number is (703) 308-3983. The examiner can normally be reached on 9:00-5:30 M-F.
